

pavanpw-18

nested or inner iframes

to get all the frames inside another frame-

returns array of frames.

```
//nested frame const childFrames=await frame3.childFrames()
```

steps-

get the main frame.

then childframes to get all child frames.

then use index of child frame to access elements.

```
1 //
2 const { test, expect } = require('@playwright/test');
3
4 // steps-
5 // get the main frame.
6 // then childframes to get all child frames.
7 // then use index of child frame to access elements.
8
9 test('Inner frames', async ({ page }) => {
10
11   await page.goto('https://ui.vision/demo/webtest/frames/');
12
13   const frame3=await page.frame
14   ({url:'https://ui.vision/demo/webtest/frames/frame_3.html'})
15   frame3.locator("input[name='mytext3']").fill('welcome')
16
17   //nested frame
18   // to get all the frames inside another frame-
19   // returns array of frames.
20   const childFrames=await frame3.childFrames()
21   await childFrames[0].locator("//*[@id='i5']/div[3]/div").check() // radio button
22
23
24   await page.waitForTimeout(5000);
25
26
27 });
```
