## Mouse Drag And Drop Action

*//Approach 1 \*/await rome.hover() await page.mouse.down()*

hover on element.

mouse down means click.

**await page.mouse.up()**

this will release the click.

```
1 //
2 const {test, expect}= require('@playwright/test')
3
4 test ('Drag And Drop', async ({page})=>{
5
6     await page.goto('http://www.dhtmlgoodies.com/scripts/drag-drop-custom/demo-drag-drop-3.html')
7
8     const rome=await page.locator('#box6')
9     const italy=await page.locator('#box106')
10
11     //Approach 1
12     /*await rome.hover()
13     await page.mouse.down() //click on the mouse button
14
15     await italy.hover()
16     await page.mouse.up() //release the mouse button
17 */
18     //Approach 2
19     await rome.dragTo(italy)
20
21     //WASHINGTON—> US
22     const washington=await page.locator('#box3')
23     const usa=await page.locator('#box103')
24
25     await washington.dragTo(usa)
26
27
28     await page.waitForTimeout(5000)
29
30 })
```
