## pavanpw-30

## record videos

can be configured only in the pw config file directly.

```
ø playwright.config.js > [ø] <unknown> > 

ø use > 

ø video

        /* Reporter to use. See https://playwright
  24
         reporter: 'html',
         /* Shared settings for all the projects be
  25
  26
         use: {
           /* Base URL to use in actions like `awai
  27
           // baseURL: 'http://127.0.0.1:3000',
  28
  29
  30
           /* Collect trace when retrying the faile
           trace: 'on-first-retry',
  31
  32
           screenshot: "on",
           video:"on"
  33
  34
  35
```

we can see under test results and in reports.

capture only on failure-

```
24
      reporter: 'html',
      /* Shared settings for all the project
25
26
      use: {
27
        /* Base URL to use in actions like
        // baseURL: 'http://127.0.0.1:3000
29
        /* Collect trace when retrying the
31
        trace: 'on-first-retry',
        screenshot: "only-on-failure",
32
        video:"retain-on-failure"
33
34
      },
```

```
import { test, expect } from '@playwright/test';

test('test', async ({ page }) ⇒ {
    await page.goto('https://www.demoblaze.com/index.html');
    await page.getByRole('link', { name: 'Log in' }).click();
    await page.locator('#loginusername').fill('pavanol');
    await page.locator('#loginpassword').fill('test@123');
    await page.getByRole('button', { name: 'Log in' }).click();
    await expect(page.locator('#logout2')).toBeVisible() //this will pass the test
    //here we purposely gave wrong to see if videos and screenshot generated on failure
    // await expect(page.locator('#logout')).toBeVisible()
    // await expect(page.locator('#logout')).toBeVisible()
```
