pavanpw-12

multi select drop down with select tag.

```
1  test("Handle multi select dropdowns with select",async ({page})⟹{
2
3      await page.goto('https://testautomationpractice.blogspot.com/');
4
5      //Select multiple options from multi select dropdown
6      //first give the locator, then pass values to select in array.
7      //await page.selectOption('#colors',['Blue', 'Red', 'Yellow'])
8
9      //Assertions
10     //1) check number of options in dropdown
11     //const options=await page.locator('#colors option')
12     //await expect(options).toHaveCount(5);
13
14     //2) check number of options in dropdown using JS array
15     //const options=await page.$$('#colors option')
16     //console.log("Number of options:",options.length)
17     //await expect(options.length).toBe(5);
18
19     //3) check presence of value in the dropdown
20     const content=await page.locator('#colors').textContent()
21     //await expect(content.includes('Black')).toBeTruthy();
22     await expect(content.includes('Black')).toBeFalsy;
23
24
25     await page.waitForTimeout(5000);
26
27 })
```
