auto suggest drop down

```
1  // first click on drop down.
2  // then wait for the drop down to come and capture all the values.
3  // capture options in variable.
4  // then use looping to get the textcontent.
5  //to disable the http2 issue for chrome browser.
6  //similarly we can do for other browser.
7  test('Auto suggest dropdown', async () ⇒{
8      const browser = await chromium.launch({
9          headless: false,
10         args: ['--disable-http2'] // ⚠ workaround for HTTP2 issue
11     });
12
13     const context = await browser.newContext();
14     const page = await context.newPage();
15
16     await page.goto('https://www.redbus.in/')
17
18     // await page.goto('https://www.redbus.in/', { waitUntil: 'domcontentloaded' });
19
20     await page.locator('#src').fill('Delhi');
21     await page.waitForSelector("//li[contains(@class,'sc-iwsKbI')]/div/text[1]")
22
23     const fromCityOptions=await page.$$("//li[contains(@class,'sc-iwsKbI')]/div/text[1]")
24
25     for(let option of fromCityOptions)
26     {
27         const value=await option.textContent()
28         //console.log(value);
29         if(value.includes('Anand Vihar'))
30         {
31             await option.click()
32             break;
33
34         }
35     }
36
37     await page.waitForTimeout(5000);
38
39 })
```
