pavanpw-31

trace viewer

go to pw config.

switch on trace.

trace file created in test result folder and in reports

to open the trace file-

trace only on failures-

```
/* Reporter to use. See https://playwright
reporter: 'html',
/* Shared settings for all the projects be
use: {
  /* Base URL to use in actions like `awai
  // baseURL: 'http://127.0.0.1:3000',

  /* Collect trace when retrying the faile
  trace: "retain-on-failure",
  //screenshot: "only-on-failure",
  //video:"retain-on-failure"
},
```

```
1  //
2
3  import { test, expect } from '@playwright/test';
4
5  test('test', async ({ page }) => {
6    await page.goto('https://www.demoblaze.com/index.html');
7    await page.getByRole('link', { name: 'Log in' }).click();
8    await page.locator('#loginusername').fill('pavanol');
9    await page.locator('#loginpassword').fill('test@123');
10   await page.getByRole('button', { name: 'Log in' }).click();
11
12   //this is pass scenario and right locator.
13     await expect(page.locator('#logout2')).toBeVisible()
14
15     //this we are failing by giving wrong locator to see trace only on failure.
16  //   await expect(page.locator('#logout')).toBeVisible()
17  });
```
